Reducing Uncertainty™ Seminar Series

Reducing Uncertainty™ in Your Estate Plan _____ *Presented by Leon LaBrecque*
Monday 11/14/11 at 10:30am

At this seminar, we will talk about reducing the threats to family wealth: probate, control, taxes and disability. Join us to find out about wills, types of trusts, estate taxation, the probate system, durable powers of attorney, forms of titling property including new types of deeds in Michigan, types of life insurance, and proper beneficiary designations. We will also be discussing your “digital legacy”, and how the new online landscape changes parts of your estate planning. Useful forms and handouts will be included.

Investment Pornography and Behavioral Finance _____ *Presented by Leon LaBrecque*
Wednesday 11/30/11 at 10:30am

In this humorous and highly rated session, we’ll be covering the behavioral aspects of finance and media, and how ‘feedback loops’ in the media can create some interesting and embarrassing projections, like the now famous 1982 cover of Business Week proclaiming ‘The Death of Equities’ at the beginning of a 1950% bull market. The goal of this session is to give you a new prospective on investing so you can see the forest through the trees. The materials alone provide a fun perspective of financial history, plus we’ll add some statistics on the current economic situation during the session. Be prepared to hear about gold, real estate, oil and rock and roll.

Economic Outlook for 2012 _____ *Presented by Leon LaBrecque*
Tuesday 12/6/11 at 12:30pm

From Global to Local: An Interesting Overview of the Economy, Markets and the Political Horizon for 2012. In this session, we will be providing an engaging and entertaining view of the world from the global level down to a local and personal level.

Limited seating available. Casual refreshments.
